

Galaxy Tachyon Chamber Pyramid and Generator Assembly Safety Agreement

The Tachyon Chamber that you are purchasing comes with a Pyramid and Tachyon Crystal Generator assembly that hangs above the chair in the chamber.

Tachyon Chamber pyramid and generator assemblies can weigh anywhere from 30 to 60 pounds in weight depending on size and structure.

It is essential that the pyramid and generator assemblies are mounted properly to a secure ceiling attachment so that they are secure and cannot fall in any way shape or form.

The only way this can be safely done is by being installed by a licensed contractor with construction and material support experience.

Your pyramid and generator assembly weighs approximately **21** lbs. and requires a support system that will safely support **63** pounds of weight.

We always make sure that the support system will support 3 times the weight of the pyramid and generator assembly for maximum safety.

I _____ have read this agreement and agree to abide by all safety precautions guidelines set forth in this agreement by Tachyon Living.

I will have my Tachyon Chamber Pyramid and Generator assembly installed by a licensed contractor that has material support experience.
